The complexity of node architectures in supercomputers increases as we cross petaflop milestones on the way towards Exascale. Increasing levels of parallelism in multi- and many-core chips and emerging heterogeneity of computational resources coupled with energy and memory constraints force a reevaluation of our approaches towards operating systems and runtime environments.

**Call for Papers**

The ROSS workshop, to be held as a full-day meeting at the ICS 2014 conference in Munich, Germany, focuses on principles and techniques to design, implement, optimize, or operate runtime and operating systems for supercomputers and massively parallel machines.

**Topics of interest:**

- OS and runtime system scalability on many-node and multi/many-core systems
- specialized OSs for Supercomputing
- distributed/hybrid/partitioned OSs and runtime systems for Supercomputing
- fault tolerance
- system noise analysis and prevention
- interaction between middleware, runtime system, and the OS
- modeling and performance analysis of runtime systems
- OS and runtime considerations for large-volume, high-performance I/O
- parallel job startup
- memory management and emerging memory technologies
- the role of OS and runtime system in minimizing power usage
- real-time considerations for Supercomputing

**Schedule and Submission Procedure**

The ROSS workshop proceedings will be published electronically along with the ICS conference proceedings via the ACM Digital Library. Submitted manuscripts should be formatted using the ACM SIG proceedings alternate format. Extensive documentation can be found at the ACM site (http://www.acm.org/sigs/publications/proceedings-templates). The maximum length is 8 pages. All papers must be in English. Please visit the workshop website (http://www.mcs.anl.gov/events/ workshops/ross/2014/) for further instructions and the submission link.

The best papers of the workshop may be considered for inclusion in a special issue of International Journal of High Performance Computing Applications (IJHPCA). The decision will be made after the workshop.
