

The slide features abstract blue geometric shapes. On the left, a light blue triangle points downwards. On the right, a complex arrangement of overlapping triangles in various shades of blue (from light to dark) forms a larger, irregular shape. A thin, light blue line extends from the bottom left towards the right, passing through the lower part of the right-side geometric shapes.

In the Beginning

Oak Ridge National Lab

PVM

- ▶ Al and Vaidy started the project in the summer of 1989 at ORNL.
 - ▶ Version 1 was used internally at ORNL and not released.
- ▶ Liz Jessup came to ORNL as the Householder Fellow, July 1990 - July 1991
 - ▶ Bob Manchek
- ▶ Bob was hired by ICL to work on extending a system called SCHED to distributed memory, was to use PVM as a platform
- ▶ Needed to rewrite PVM
- ▶ Version 2 was rewritten and released March 1991.
- ▶ Version 3 was a redesign and finished in March 1993.

1991 - 1992

- ▶ The MPI effort began in the summer of 1991 when a small group of researchers started discussions at a mountain retreat in Austria.
 - ▶ IBM Oberlech Conference
 - ▶ Tony Hey, Rolf Hempel, Ulrich Trottenberg, JD
- ▶ Message passing was in the air
 - ▶ Intel NX, Express, Zipcode, PARMACS, IBM EUI/CCL, PVM, P4, Occam, Linda, ...
- ▶ Many groups pursuing ideas
- ▶ Concern there would be European and competing US efforts
- ▶ The community felt the need to have a standard message passing interface.
 - ▶ We were developing ScaLAPACK and needed a portable way to do MP

- 
- ▶ Out of that discussion in Oberlech came the request for a workshop to discuss the issues.
 - ▶ Ken Kennedy agreed to a CRPC sponsor a workshop.
 - ▶ Scalable High Performance Computing Conference (SHPCC) '92, Williamsburg, VA, Hilton Conference Center, April 26-29, 1992.
 - ▶ At this workshop the basic features essential to a standard message-passing interface were discussed, and a working group established to continue
- 

Dear Colleague,

We would like to invite you to attend a workshop on "Standards for Message Passing in a Distributed Memory Environment", sponsored by the Center for Research on Parallel Computation (CRPC). We expect this to be the first in a series of workshops directed at establishing standards for message passing systems and protocols in distributed memory environments. To this end, the workshop will bring together leading researchers from academic and government labs, and representatives from the leading vendors of distributed memory computers and message passing systems.

The workshop will mostly consist of short (15-20 minute) presentations followed by plenty of discussion time. A panel session is also planned. If you would like to give a presentation, or have any other suggestions concerning the format or content of the workshop, please send email to walker@msr.epm.ornl.gov. Attendance will be limited to 50-60 people. If you want to participate in the workshop you must let us know as soon as possible.

The workshop will be held at the conference center of the Williamsburg Marriott Hotel, 50 Kingsmill Road, Williamsburg, VA 23185, beginning at 2pm on Wednesday, April 29, 1992, and ending at 5pm the next day. Please note that the workshop immediately follows the 1992 Scalable High Performance Computing Conference, which is being held at the same location. A block of rooms has been reserved at the Hilton at the special rates of \$68 for a single room and \$100 for a double room (excluding tax). To take advantage of these rates, make your reservation before March 30, and identify yourself as a workshop participant. The telephone number for reservations is (804) 220-2500 or 1-800-HILTONS.

Please let us know if you will be attending the workshop by notifying David Walker by email at walker@msr.epm.ornl.gov. David may also be contacted by phone at (615) 574-7401, or fax at (615) 574-0680, and is the point of contact for all matters concerned with the organization, content, and logistics of the workshop.

We look forward to your participation in the workshop!

With Best Regards,

Jack J. Dongarra
Geoffrey C. Fox
Ken Kennedy
David W. Walker

Jack, the following mail is in reference to our planned workshop on a universal message-passing interface that I believe you were going to ask David Walker to arrange as a CRPC workshop. What is the status of this? I believe we should invite the Europeans if possible.

Workshop on Standards for Message Passing in a Distributed Memory Environment

- ▶ Sponsored by the Center for Research on Parallel Computing, held April 29-30, 1992, in Williamsburg, Virginia
- ▶ Attended by a total of 68 invited participants from universities, government laboratories, and hardware and software vendors.
- ▶ This workshop showed that broad-based support exists within the high performance computing community for a message passing standard for distributed memory computing systems.
- ▶ The workshop discussed the important components that should be included in such a standard, and stressed the necessity of defining a global standard, rather than just a U.S. standard.
- ▶ Following the workshop, a preliminary draft proposal, known as MPI, was put forward by Dongarra, Hempel, Hey, and Walker in October 1992.
 - ▶ Borrowing heavily from Marc Snir's work at IBM
- ▶ A meeting of the MPI working group was held at SC'92 in Minn.
 - ▶ Decided to place the standardization process on a more formal footing, and generally to follow the format and organization of the High Performance Fortran Forum.

**The First CRPC Workshop on
"Standards for Message Passing in a Distributed
Memory Environment"**

April 28-30, 1992

Hilton Conference Center
Williamsburg, Virginia, USA

Wednesday, April 29

First Session, 2:00pm to 3:15pm

- "Message Passing Systems: Portability, Capability, Performance, Standards," Anthony Skjellum, Lawrence Livermore National Laboratory (30 min)
- "European Initiatives Towards a Message Passing Standard," Rolf Hempel, GMD (30 min)
- Open Discussion (15 min)

Break, 3:15pm to 3:30pm

Second Session, 3:30pm to 5:30pm

- "PACL: Description, Experiences, and Implications for Message-Passing Interface Standards," Patrick Worley, Oak Ridge National Laboratory (25 min)
- "The Express Parallel Programming Environment," Jon Flower, Parasoft Corporation (25 min)
- "Standards for Building Message Passing Systems Capable of Supporting Higher-Level Parallel Languages," Robert Bjornson, Scientific Computing Associates (25 min)
- "Heterogeneous Distributed Computing with PVM," Adam Beguelin, University of Tennessee and Oak Ridge National Laboratory (25 min)
- Open Discussion (20 min)

Reception, 5:30pm to 7:30pm

Banquet, 7:30pm to 9:30pm

Fifth Session, 2:00pm to 3:50pm

- "PARMACS: the ANL/GMD Portability Macros for Message Passing," Rolf Hempel, GMD (25min)
- "MetaMP: A Higher Level Abstraction for Message Passing," Steve Otto, Oracle Corporation (25 min)
- "A Set of High Level Collective Communication Routines for Multicomputers," van de Geijn, University of Texas at Austin (25 min)
- "PVM++: An Object-Oriented Interface for Heterogeneous Computing," Rolf Hempel, University of Tennessee (25 min)
- Open Discussion (10 min)

Break, 3:50pm to 4:00pm

Sixth Session, 4:00pm to 5:00pm

- Panel Discussion (55 min)
 - Ken Kennedy, Rice University, moderator
 - Al Geist, Oak Ridge National Laboratory
 - Michael Heath, University of Illinois
 - Rolf Hempel, GMD
 - Anthony Skjellum, Lawrence Livermore National Laboratory
- Wrap-Up, David Walker and Jack Dongarra (5 min)

Workshop Ends, 5:00pm

MPI Forum

- ▶ Created using the HPF model (Bristol Suites)
- ▶ A group of 30-40 “experts” in message-passing
Including [MPP vendors](#),
[CS researchers](#),
[Application developers](#).
- ▶ Met 3 days every 6 weeks for 1.5 years
and created the MPI-1 specification draft.

Goal: To come out within a few years with a “standard” for message passing building on lessons learned from existing interfaces/languages.

MPI Meetings

- ▶ Workshop April 29-30, 1992, in Williamsburg, Virginia
- ▶ SC92, Minneapolis
- ▶ January 6-8, 1993
- ▶ February 17-19, 1993
- ▶ March 31-April 2, 1993
- ▶ May 12-14, 1993
- ▶ June 23-25, 1993
- ▶ August 11-13, 1993
- ▶ September 22-24, 1993
- ▶ October 27-29, 1993 meeting in Europe
- ▶ SC93 Draft presented, public comments
- ▶ February 23-25, 1994, Knoxville
- ▶ Version 1.0 of MPI was released in June 1994

- ▶ Draft MPI standard was presented at the Supercomputing '93 conference in November 1993.
- ▶ Public comment
- ▶ Version 1.0 of MPI was released in June 1994.

First
European PVM Users' Group Meeting
Rome, Italy
October 9-11 1994, Universita' di Roma, Rome

- CALL FOR PAPERS - CALL FOR PAPERS - CALL FOR PAPERS - CALL FOR PAPERS -

Sponsored by

IBM European Center for Scientific and Engineering Computing
Ecole Normale Supérieure de Lyon CASPUR c/o Universita' di Roma

The first European PVM Users Group Meeting will be held October 9 to 11, 1994, at the Conference Center of the University of Rome, Via Salaria 113, Rome, Italy.

The meeting will provide an opportunity for European users of PVM to meet each other, share ideas and experiences, and meet some of the members of the PVM Team.

The conference will include:

- * Invited talks by:
 - Wolfgang Gentzsch (Genias, Germany),
 - Vaidy Sunderam (Emory University),
 - Bernard Tourancheau (LIP, France),
