

J. Walter Larson

CONTACT INFORMATION	Mathematics and Computer Science Division Argonne National Laboratory 94 Officer Place Ainslie ACT 2602 AUSTRALIA EMAIL: larson@mcs.anl.gov	
RESEARCH INTERESTS	Climate and Earth System Science; Parallel computing; high-performance computing applied to climate modeling, weather forecasting, and multiphysics/multiscale simulation; software engineering; computational statistics; complex and dynamical systems.	
EDUCATION	College of William and Mary, Williamsburg, Virginia, U.S.A. Ph.D. Theoretical Plasma Physics, 1992 M.Sc. Physics, 1986 Drake University, Des Moines, Iowa, U.S.A. B.A. Physics and Mathematics, 1984	
CITIZENSHIP	United States of America Commonwealth of Australia	
EMPLOYMENT HISTORY	Research and Teaching Assistantships , Physics Department, College of William and Mary, 1984–1992 Dynamical Systems Consultant to Allied Signal, May–October 1992 Postdoctoral Fellow , School of Earth Sciences, Macquarie University, October 1992–June 1994 Postdoctoral Fellow , Centre for Resource and Environmental Studies, The Australian National University, June 1994–May 1996 Consultant , Department of Earth and Atmospheric Sciences, Purdue University, June–October 1996 Research Associate , Department of Meteorology, Earth System Science Interdisciplinary Center (ESSIC), University of Maryland and NASA Data Assimilation Office (DAO), NASA Goddard Flight Center, October 1996–December 1999 Assistant Computational Scientist , Mathematics and Computer Science Division, Argonne National Laboratory, December 1999–December 2004 Senior Fellow , Computation Institute, University of Chicago, October, 2003–present Software Engineer (equivalent to Level C Academic at an Australian University), Mathematics and Computer Science Division, Argonne National Laboratory, January 2005–April 2007 Academic Consultant , ANU Supercomputer Facility, Australian National University, February 2006–February 2008 Visiting Fellow , Department of Plasma Theory and Modelling Group, Plasma Research Laboratory, Research School of Physics and Engineering, The Australian National University, October, 2006–present Computational Scientist , Mathematics and Computer Science Division, Argonne National Laboratory, May, 2007–present Adjunct Lecturer (Level C), School of Computer Science, The Australian National University, March, 2008–present	

AWARDS AND
HONORS

1. **Best Paper Award**, International Parallel and Distributed Processing Symposium, 2005
2. **Best Unsolicited Presentation**, Complex Systems in the Earth Sciences Track, 8th Asia-Pacific Complex Systems Conference (Complex07), 2007

GRANT,
CONTRACT, AND
AWARD FUNDING

- 1 NSF NATO Summer School Travel Grant Award, 1992 \$1,000
- 2 Consultancy in phase-space methods and timeseries analysis (with E. R. Tracy), Allied Signal, May–October 1992, \$10,000
- 3 “The Penn State/NCAR MM5 on the AP1000,” Contract with Fujitsu Corporation Ltd Japan, J. W. Larson and J. A. Taylor, 1995 \$23,000
- 4 “Delivering High-Resolution Regional Climate Data and Analysis Tools via the Web,” ANL Cooperative Research and Development Agreement (CRADA) with Research Systems, Inc., John Taylor (PI), Jay Larson, and Ian Foster: \$25,000 (FY 2000)
- 5 “Development of a Modular, Performance-Portable Climate System Model,” United States Department of Energy BER project, Ian Foster (PI), DOE and NCAR co-I’s: Chris Ding, John Drake, Phil Jones, Jay Larson, Doug Rotman, Thomas Bettge, Maurice Blackmon, Byron Boville, Cecelia Deluca, David Williamson. Argonne funding: \$240,000 (FY2000) and \$480,000 (FY2001)
- 6 “Climate Applications of the Common Component Architecture and the Terascale Simulation Tools and Technologies,” DOE/MICS Scientific Discovery through Advanced Computing program, MICS matching funds (funded FY2002-FY2006). Total funding: \$550,000
- 7 “Collaborative Design and Development of the Community Climate System Model for Terascale Computers,” DOE/BER Scientific Discovery through Advanced Computing (SciDAC) / Climate Change Prediction Program (CCPP) (funded FY2002-FY2006), R. Malone and J. Drake (PIs), co-I’s: C. Ding, P. Duffy, D. Erickson, S. Ghan, R. Jacob, P. Jones, J. Larson (Argonne PI 2003-6), A. Mirin, D. Rotman, J. Taylor, P. Worley, T. Bettge, M. Blackmon, T. Craig, C. Deluca, S-J. Lin, W. Washington, and D. Williamson. ANL funding 2000-2005 \$3.5M
- 8 “A High-Performance Software Framework and Interoperable Applications for the Rapid Advancement of Earth System Science: Part I: Core Earth System Modeling Framework Development,” NASA Earth System Technology Office/Computational Technology (ESTO/CT) program (funded 2002-2004), Timothy Killeen (PI), co-I’s: Jeffery Anderson, Byron A. Boville, Cecelia Deluca, Arlindo da Silva, Roberta Johnson, Philip W. Jones, J. Walter Larson, Stephen J. Lord, John Marshall, Barry F. Smith, Quentin F. Stout, and Max J. Suarez. Total ANL funding 2002–2004: \$338,700
- 9 “A Data Domain to Model Domain Conversion Package (DMCP) for Sparse Climate Related Process Measurements,” DOE-BER, SciDAC / Climate Change Prediction Program (funded FY2007-FY2011), R. Kotamarthi (PI), M. Stein (co-PI), J. W. Larson(co-PI), R. L. Jacob, and R. Coulter, Total ANL Funding 2007–2011: \$1.5M
- 10 “Framework Application for Core-Edge Transport Simulations (FACETS),” DOE-FES, SciDAC Program (funded FY2007-FY2011), J. Cary (PI), J. W. Larson (co-PI), D. Estep, D. Keyes, J. Candy, R. Bramley, R. Cohen, P. H. Worley, A. D. Malony, D. M. McCune, S. Krasheninnikov, Total ANL Funding 2007–2011: \$1.125M
- 11 “Performance of the Nested Regional Climate Model over the U.S. Midwest,” Argonne National Laboratory LDRD Proposal, FY11, J. W. Larson (PI), total funding \$140k

COMMUNITY
SERVICE

Member, Fusion Simulation Program Workshop Panel and Report co-author, United States Department of Energy, May, 2007

Secretary, ACT Chapter ANZIAM, January 2007-December 2007

Organizer of Bird-of-Feather Session “The Parallel Coupling Problem: An Emerging Challenge in Scientific Simulation,” Supercomputing, 2005

Session Organizer, SIAM Parallel Processing 2004 and 2006

U.S. Department of Energy Common Component Architecture (CCA) Climate Applications Liason

Organizer of Bird-of-Feather Session “The High-Performance Computing and Climate/Weather/Ocean Communities: The State of the Union,” Supercomputing, 2003

Proposal Referee, U.S. Department of Energy Climate Change Prediction Program, 2001 and 2004

Member, NASA Earth System Modeling Framework (ESMF) Specification Team

Member, DOE Climate Change Prediction Program Science Team Steering Group, 2004-2006

Member, Community Climate System Model (CCSM) Software Engineering Working Group, 2000-2006

Section Editor, *ANZIAM Journal*, 2007-2008

Proposal Referee, National Environmental Research Council (UK), 2008

Judge, US Department of Energy Science and Energy Research Challenge Competition, 2009

Technical Committee, IEEE Workshop on Parallel and Distributed Scientific and Engineering Computing, IPDPS 2011 and 2012

Co-convenor, Workshop on Data Mining in Earth System Science, ICCS 2011 and 2012

SUPERVISION OF
STUDENTS:

Undergraduate Students:

Kevin Reitz, Boreal Summer, 2000

Everest Ong, Boreal Summer-December, 2000

Corey McCaffrey, Boreal Summer 2001

Mark Zavislak, Boreal Summer, 2001, Summer 2002

Robert Altmiller, Boreal Summer 2004

Romesh Abeysuriya, Austral Summer 2009-10

Graduate Students:

Corinne Tokarz, Boreal Summer 2001, Co-op 2001-2002 Academic Year

Ian Wood, Master’s Student, ANU, 2008 Academic Year

TEACHING
EXPERIENCE

Approximately five years’ experience teaching physics and astronomy at the university level (mostly laboratory courses, but also graded introductory and upper-level undergraduate courses)

J. Fedchak and W. Cummings, and J. W. Larson, “Physics and the Creative Process,” Forum with the Psychology of Creativity course at Columbia College, Chicago, 12 December 1995.

Teacher, Scuola Estiva di Calcolo Avanzato, Castel Gandolfo, Italy, 5-9 September 2005. I taught a graduate-level short course entitled “The Parallel Coupling Problem in Multiphysics Simulation.”

Guest Lectures on large-scale supercomputing systems, grid computing, and climate appli-

cations, CS4300 class on parallel systems, Department of Computer Science, The Australian National University, 2007.

Guest Lectures on large-scale supercomputing systems, grid computing, cloud computing, climate applications, and MapReduce, CS4300 class on parallel systems, Department of Computer Science, The Australian National University, First Semester 2009. Was also second examiner for this course.

Guest Lecturer on OpenMP for CS8320, a graduate-level multicore computing class, second semester 2009.

Guest Lectures on large-scale supercomputing and climate modeling, CS4300, ANU

Guest Lecture on the first Pythonic coupled climate model, CS1730, ANU

PROFESSIONAL
SOCIETY
MEMBERSHIPS

American Geophysical Union

American Meteorological Society

Association for Computing Machinery

Society for Industrial and Applied Mathematics

Australian Meteorological And Oceanographic Society

Australian Mathematical Society (AustMS)

Australian and New Zealand Industrial and Applied Mathematics Division, AustMS

BOOKS
PUBLISHED OR
EDITED, THESES

1. J. W. Larson, "Painlevé Singularity Analysis Applied to Charged Particle Dynamics During Reconnection," Ph.D. Thesis, College of William and Mary, 1992.
2. W. Read, A. J. Roberts, and J. W. Larson, *Proceedings Computational Techniques and Applications Conference (CTAC06)*, published as electronic supplement to Volume 48 of *ANZIAM Journal* (2006-7).

SOFTWARE

1. DAO On-line observational quality control system, in operational use at the NASA Global Modeling and Assimilation Office.
2. Physical-space Statistical Analysis System (PSAS), in operational use at the NASA Global Modeling and Assimilation Office.

3. Model Coupling Toolkit, released and publicly available from the MCT Web site <http://www.mcs.anl.gov/mct>. Used widely in the climate community, and is bundled with the source code of both CCSM and the Regional Ocean Modeling System (ROMS).
4. Community Climate System Model (Flux Coupler), released and publicly available from the CCSM Web site <http://ccsm.ucar.edu>.
5. Earth System Modeling Framework (ESMF), released and publicly available from the ESMF Web site <http://www.esmf.ucar.edu>.

INVITED TALKS

1. "Analysis of GCM Output on the Annual, Seasonal, Monthly, and Daily Time-scales," Intergovernmental Panel on Climate Change (IPCC) Meeting, Sydney, Australia, 7–9 February 1994.
2. "Parallelization of the Physical-space Statistical Analysis System (PSAS)," NASA Computational Aerosciences (CAS) Workshop '98, NASA Ames Research Center, Mountain View, CA, 25–27 August 1998.
3. "Software Implementation of the Physical-space Statistical Analysis System (PSAS)," PSAS Workshop, NASA Goddard Space Flight Center, 26 October 1998.
4. "Proposal for standard diagnostics and data interchange modules in PIRCS," Project to Intercompare Regional Climate Simulations (PIRCS) Review and Planning Workshop, Copenhagen, Denmark, 22–23 May 2000.
5. "The Model Coupling Toolkit," Workshop on Space Environment Model Interfaces, University of Michigan, Ann Arbor, MI, 17–18 July 2001.
6. "MCT: What's Going On," Fourth International Workshop on Next Generation Climate Models for Advanced High Performance Computing Facilities, NCAR, Boulder, Colorado, 12–14 March 2002.
7. "A Component Programming Model for the Model Coupling Toolkit," Joint SWMF-ESMF Interoperability and Model Coupling Workshop, University of Michigan, Ann Arbor, MI February 25-26, 2003.
8. "The MxN Problem," Joint SWMF-ESMF Interoperability and Model Coupling Workshop, University of Michigan, Ann Arbor, MI 25–26 February 2003.
9. "The New Coupling Infrastructure for the CCSM," invited talk, Climate Change Prediction Program Meeting, Charleston, SC, 17–19 March 2003.
10. "The MCT Component Programming Model," invited talk, Workshop on Emerging Practices for Component Interfaces in Earth System Models, Geophysical Fluid Dynamics Laboratory, Princeton, NJ, 14 May 2003.
11. "The Parallel Coupling Problem: Organizing Principles and the Model Coupling Toolkit Approach," Joint ORNL/IU Workshop on Computational Frameworks in Fusion, Oak Ridge National Laboratory, 7-9 June, 2005.
12. "The Parallel Coupling Problem in Multiphysics Modeling," invited talk, SIAM Annual Meeting, New Orleans, LA, 11 July 2005.
13. "The Model Coupling Toolkit," invited talk, DOE ACTS Collection Workshop, Berkeley, CA 26 August 2005.
14. "A Parallel Coupling Problem and Model Coupling Toolkit Primer," invited talk, Australian Partnership for Advanced Computing Parallel Coupled Models Workshop, Canberra, 10 April 2006.
15. "Computational Issues in Parallel Coupled and Multiphysics Models," invited talk, CSIRO Mk3L Workshop, University of New South Wales, 25-26 May, 2006.

16. J. W. Larson, M. Tobis, M. Steder, R. T. Pierrehumbert, R. L. Jacob, and E. T. Ong, “pymCT and pyCPL: Refactoring the Community Climate System Model Using Python,” Python Workshop at the Thirteenth Biennial Computational Techniques and Applications Conference (CTAC ’06), Townsville, Australia, 6 July, 2006.
17. J. W. Larson and R. L. Jacob, “MCMD and MCT: We’ve Been Doing This a While,” CCA MCMD Workshop, Snoqualmie, WA, January 24, 2007.
18. J. W. Larson and R. L. Jacob, “Coupling, Parallel Coupling, and the MCT Programming Model,” ITAPS/CCA Coupling Workshop, Chicago, IL, March 9, 2007.

SEMINARS AND
COLLOQUIA

1. “Analysis and Packaging of GCM Output,” Centre for Resource and Environmental Studies (CRES) Seminar, The Australian National University, 12 May 1994.
2. “Regional and Global Atmospheric Models on the AP1000,” CAP Technical Group Seminar, The Australian National University, July 13, 1995.
3. “A few Remarks on Numerical Model Validation and Sensitivity Analysis,” ANU Advanced Computation Seminar, The Australian National University, 29 April 1996.
4. “The Physical-space Statistical Analysis System (PSAS),” Seminar, Mathematics and Computer Science Division, Argonne National Laboratory, 30 July 1999.
5. J. W. Larson and R. L. Jacob, “The Model Coupling Toolkit,” Brown Bag Seminar, Mathematics and Computer Science Division, Argonne National Laboratory, 11 January 2001.
6. “The Physical-space Statistical Analysis System (PSAS)—A Parallel Framework for Atmospheric Data Analysis?,” ALICE Brown Bag Seminar, Mathematics and Computer Science Division, Argonne National Laboratory, 23 March 2000.
7. “The Model Coupling Toolkit,” Seminar, Naval Postgraduate School, Monterey, CA, 31 May 2001.
8. “A Fortran90 Model Coupling Toolkit,” Seminar, Southwest Research Institute, San Antonio, TX, 5 October 2001.
9. “What is the Model Coupling Toolkit?” Seminar, NASA Center for Computational Sciences (NCCS), NASA Goddard Space Flight Center, 9 November 2001.
10. “The Model Coupling Toolkit: Building Blocks for Parallel Earth System Models,” Seminar, Atmospheric Science Division, Lawrence Livermore National Laboratory, 25 February 2002.
11. “From Parallel Models to Parallel ‘Super Models’ Using The Model Coupling Toolkit,” Seminar, Sandia National Laboratory, 26 February 2002.
12. “Coupled Climate Models as We Know Them,” Seminar, Earth Observation Centre, CSIRO Australia, March 3, 2005.
13. “The Parallel Coupling Problem and the Model Coupling Toolkit,” Seminar, Center for Advanced Scientific Computing, Lawrence Livermore National Laboratory, April 26, 2005.
14. “The Parallel Coupling Problem,” Advanced Computation and Modelling Seminar, Mathematical Sciences Institute, Australian National University, 1 May 2006.
15. “MPEU: Message Passing Environment Utilities,” ANU Supercomputer Facility Seminar, Australian National University, 2 May 2006.
16. “Asleep at the Switch: The Case for Parallel Programming in the Analysis of Big Geophysical Data,” Seminar, CSIRO Davies Laboratory, Townsville, Australia, 7 July, 2006.
17. “Parallel Infrastructure for Coupled Models and Data Assimilation Systems,” Seminar, Australian Bureau of Meteorology, Melbourne, Australia, 10 August, 2006.

18. "Wanted: A Theory of Model Coupling," Complex and Open Systems Network Seminar, Department of Theoretical Physics, Research School of Physical Sciences and Engineering, The Australian National University, 5 October, 2006.
19. "The Model Coupling Toolkit Stump Speech," Seminar, ANU Supercomputing Facility, 31 October, 2006.
20. "MCT: A Programming Model for Coupled Model Construction," seminar Computational Sciences and Mathematics Division, Pacific Northwest National Laboratory, March 13, 2007.
21. MCT: Middleware for Multiphysics Modeling," seminar, Institute for Applied Physics and Computational Mathematics, Beijing, May 30 2007.
22. "Coupled Climate Modelling and Computation: Two Things That Go Together," seminar, Queensland Climate Change Centre of Excellence, Department of Natural Resources and Water, Brisbane, July 5, 2007.
23. "Climate and Earth System Models: What's Under the Hood, and What's Going There Next?," Stout Lecture, Department of Geosciences, University of Nebraska, Lincoln, Nebraska, November 14 2008.

OTHER
CONFERENCE
PRESENTATIONS
NOT PUBLISHED
IN PROCEEDINGS

1. "Averaging of Nonlinear Wavetrains," Sherwood Plasma Theory Conference, Gatlinburg, Tennessee, 18–20 April 1988.
2. "A Simulation of Interactions between a Wave Packet and Particles Trapped in a Magnetic Mirror Field," First General Meeting of the APS Topical Group in Computational Physics, Boston, Massachusetts, 5–8 June 1989.
3. "Particle Dynamics in the Neighborhood of a Magnetic Null," American Geophysical Union Spring Meeting, Baltimore, MD, 28–31 May 1991.
4. "Painlevé Analysis of Reconnection Fields," Thirty-third Annual Meeting of the American Physical Society, Division of Plasma Physics, Tampa, FL, 4–8 November 1991.
5. "Painlevé Analysis Applied to Particle Dynamics in Magnetic and Electric Fields Associated with Reconnection," Sherwood Plasma Theory Conference, Santa Fe, NM, 6–8 April 1992.
6. "Integrability Properties of Particle Dynamics During Reconnection," Spring Meeting of the American Geophysical Union, Montréal, 11–15 May 1992.
7. "Phase-Space Methods Applied to Climate Model Output," Tripartite Meeting on Climate Model Validation and Regional Scenarios, Melbourne, Victoria, 4–7 April 1993.
8. "Total Cloud Amount as Represented by GCMs," MECCA Technical Committee Meeting, Sydney, Australia, 10–11 February 1994.
9. "Tropical Cyclones and Climate Change," MECCA Technical Committee Meeting, Sydney, Australia, 10–11 February 1994.
10. J. Taylor, J. Larson, and I. Foster, "Bridging the Climate Information Gap: A Case Study for the U.S. Midwest," Climate Change Prediction Program Workshop, Bethesda, MD, 27–29 March 2000.
11. J. A. Taylor and J. W. Larson, and I. T. Foster, "Regional Climate Simulations for the U.S. Midwest Using MM5v3," MM5 Users' Workshop, Boulder, CO, 22–25 June 2000.
12. J. W. Larson, "A Set of File and Diagnostic Utilities for MM5v3," MM5 Users' Workshop, Boulder, CO, 22–25 June 2000.
13. J. Larson, R. Jacob, and J. Guo, "Under Construction: The Model Coupling Toolkit," Chattaqua Workshop on Lake Superior, Two Harbors MN, 3–5 November 2000.

14. J. A. Taylor and J. W. Larson, "High Resolution Regional Climate Modeling for the Midwest and Great Plains using MM5v3," American Geophysical Union Fall Meeting, 14–19 December 2000.
15. J. W. Larson and R. J. Oglesby, "Determining Large versus Small-Scale Atmospheric Variations Through the Application of Statistical Polishing," American Geophysical Union Fall Meeting, 14–19 December 2000.
