

Charlie Vanaret

POSTDOCTORAL RESEARCHER IN OPTIMIZATION

☎ (+33) 6 80 54 06 08 | ✉ cvanaret@anl.gov | 🏠 <http://www.mcs.anl.gov/~vanaret>

Experience

Argonne National Laboratory, Mathematics and Computer Science Division

Lemont, IL, USA

POSTDOCTORAL APPOINTEE

May 2017 - to date

Supervised by Sven Leyffer

- Participate in *Robust nonlinear optimization* project
- Lead developer of a C++ solver for robust nonlinear optimization based on a trust-region SQP-filter method, to be released as open source software in 2018

IRT Saint Exupéry, Department of Embedded Systems

Toulouse, France

POSTDOCTORAL RESEARCHER

Sept 2015 - March 2017

Supervised by Anne Gazaix (Airbus)

- Participated in *Multidisciplinary Design Optimization* project for aeronautical optimization (TRL 3-5)
- Performed mathematical analysis of distributed resolution strategy, computation of coupled sensitivities, implementation and numerical comparison with other strategies
- Contributed to the design and implementation of an industrial-scale Python framework
- Devised and implemented a methodology to assist in the comparison of resolution strategies

IRIT, Parallel Algorithms and Optimization Team

Toulouse, France

TEACHING AND RESEARCH FELLOW

Nov 2014 - Aug 2015

Supervised by Daniel Ruiz

- Co-supervised an undergraduate student in Python programming
- Participated in *Genomic Breeding decision support* project: correlation of genotypic and phenotypic measures of corn plants
- Suggested models for missing DNA information and validated them on real data provided by two French seed companies

Awards

2015 **Léopold Escande prize (15% best PhD theses of the year)**, INPT

Toulouse, France

2015 **Paul Sabatier prize (best research work in mathematics/computer science)**, Académie des Sciences de Toulouse

Toulouse, France

Education

INPT (Toulouse institute of technology) - ENAC (French civil aviation university)

Toulouse, France

PHD IN COMPUTER SCIENCE

2011 - 2014

Hybridization of evolutionary algorithms and interval-based methods for optimizing difficult problems, defended on 27 January 2015

Supervised by Nicolas Durand (ENAC)

ENSEEIH (Graduate school of engineering in computer science)

Toulouse, France

ENGINEERING DIPLOMA IN COMPUTER SCIENCE AND APPLIED MATHEMATICS

2008 - 2011

Differential calculus, linear algebra, operations research, imperative, functional and object-oriented programming

Alpen-Adria Universität Klagenfurt

Klagenfurt, Austria

ERASMUS SEMESTER

2010 - 2011

Soft computing, intelligent agents, computational intelligence, web technologies

Skills

Operating systems GNU/Linux, Microsoft Windows

Programming C++, C, Python, Matlab, Java, OCaml

Continuous integration Agile software development, Jenkins, unit testing (nose2, gtest)

Software Eclipse, Emacs

Version control Git, Mercurial, SVN

Typesetting \LaTeX , OpenOffice, Microsoft Office

Teaching experience (275 hours)

ENSEEIH	Tutor in operations research (44 hours), functional programming (156 hours), probability theory and statistics (12 hours) and middleware (22 hours) for first- and second-year engineering students in computer science and applied mathematics
INPT	Tutor in imperative programming in Python (16 hours) for undergraduate students preparing competitive entrance to engineering schools
ENAC	Project supervisor for first- and second-year engineering students in computer science Tutor in physics and chemistry for student pilots, taught course in English (25 hours)

Languages

English	Fluent. TOEIC score: 990/990 in June 2010
German	Advanced level. 10+ years learning, spent a year in Austria
French	Native speaker

Leisure activities

Electric bass	Playing since 2003. Opened for renowned French artists (Soldat Louis, Manau, Michael Jones)
Performing arts	Taking singing lessons since 2015. Put on a musical with a group of ten singers (two performances in Toulouse in 2016)
Table tennis	Playing since 2003. Ranked 4th in school team national championship in 2006. President of the INPT university club in 2009

Selected publications

BOOK CHAPTERS
